SUMMARY

Energetic and ambitious computer science engineering student with a strong passion for technology and innovation. Possessing a solid foundation in fundamental computer science concepts and a drive to continuously expand my knowledge, I am eager to embark on a career in the dynamic field of technology. Keen interest in software development, artificial intelligence, and data science, I am committed to leveraging my academic background and hands-on experience to tackle real-world challenges and make meaningful contributions to the industry.

EDUCATION

Chandigarh University, Mohali, Punjab

10/09/2021 - 25/06/2025

B.E.-Computer Science Engineering - 7.15

G.N. National Public School, Gorakhpur, Uttar Pradesh

May 2019 - May 2021

Intermediate - 92.60

St. Anthony's Convent School, Gorakhpur, Uttar Pradesh

May 2017 - May 2019

High School - 91.30

PROJECTS

Face Hit 🔗

December 2023 - March 2024

- Built a basic web game using image recognition
- Main languages - HTML, CSS and JavaScript
- Uses Image recognition to use user's nose as a pointer to point to the target
- Stores the users top score locally
- Uses image recognition and machine learning API to recognize user's face

Basic Digital Alarm Clock 🔗

November 2023 - January 2024

- Digital Clock: Displays current time, date, and day.
- Resizable UI: UI elements resize dynamically when the window is resized.
- Set Alarm: Allows the user to set multiple alarms using a 24-hour format (HH:MM).
- Alarm Notifications: Alerts the user with a pop-up and plays a sound.
- Snooze Alarm: If not stopped, the alarm replays every 10 minutes.
- Stop Alarm: Stop the alarm sound at any time.
- Manage Alarms: View, delete, and clear alarms from the list of active alarms.

Keylogger 🔗

June 2023 - September 2023

- Built a basic keylogger program to understand the working of keylogger
- Libraries used - pynput, datetime and smtplib
- Logs the key typed on keyboard with and date and time in text file
- Send the log file to the user through email

Online examination platform 🔗

April 2023 - July 2023

- Built a sample platform for conducting exams online
- Languages used- PHP, JavaScript, SQL and CSS
- Has student and teacher dashboard for both for their use
- Stores user's data and password in SQL file

SKILLS

- Proficient in Java and Python programming languages.
- Knowledgeable in Data Structures and Algorithms.
- Familiarity with Object-Oriented Programming (OOP) concepts.
- Experience with MySQL and MongoDB databases.
- Understanding of Computer Networks and Network Security.

Certifications:

- Java Programming (Coursera)
- Programming in Python (Coursera)
- Data Structures (Coursera)
